IMPORTANT

While we make efforts to ensure that our lists of doctors and hospitals are up to date and accurate, providers do leave our networks from time to time, and these listings do change. There are hospitals, doctors or other providers who are not included in every plan network. **Please make sure you are searching the right network.** Logging in as a member is the most accurate method to search for providers in your plan network. You may also enter your Prefix (the first three values of your member number on your ID card). There may be higher costs to you if you visit a provider who is not in your plan network. We recommend you contact the provider to confirm that they are in your plan network and that the desired service is covered.

If you are an HMO member, you may need a referral from your Primary Care Physician (PCP) before you receive care for non-emergency services.

This provider offers services throughout the state. Please click on their website or call the toll-free number for locations.

The Patient Ratings & Reviews is available for informational purposes only and to use as you see fit. We do not guarantee its use, or its accuracy, reliability, timeliness, and the like. While we do monitor comments for inappropriate or offensive language, we are not responsible for the comments made by users or the accuracy of information in those comments. The Patient Ratings & Reviews is not a referral service and does not offer advice about which doctor or other healthcare provider is right for your medical needs.

Ohio Provider Information

Please see the following important Ohio Provider information for using this directory.

While we make efforts to ensure that our lists of doctors and hospitals are up-to-date and accurate, it is important to understand that sometimes health care providers leave our networks without letting us know, or they switch networks, or they change employment with provider groups and hospitals. Depending on your plan, these changes may impact how much you pay out of your own pocket for services.

Not all doctors and hospitals are included in every plan's network. In order to avoid higher costs, it is important to understand if your provider participates in your plan's network and if your plan's network includes Tiered providers. If you visit a provider who is not in your plan's network or who is a Tier 2 provider for applicable Tiered plans, you may be required to pay a greater percentage of the deductible and/or co-insurance. (Tiered benefit plans enable you to pay lower cost share amounts by using providers in a plan network who are assigned to benefit Tier 1 or Tier 2. Although both Tiers represent in-network providers, you will generally be responsible for lower copayments, deductibles and coinsurance - and, therefore, pay less - if you use a Tier 1 provider.)

If you are a current member, logging in as a member is the most accurate way to search for providers in your plan network. You may also enter your prefix (the first three values of your member ID number on your Anthem ID card) to search for in-network health care providers based on your plan prefix. Your doctor may refer you to another provider or facility for treatment. In-network providers are required to make best efforts to refer you to other in-network providers when possible. However, it is important to remind your doctor to refer you to in-network care

providers in order to avoid out-of-network costs and balance billing by non-participating providers.

If you receive services from an in-network hospital, the hospital may have arrangements with emergency room physicians, anesthesiologists, radiologists, and/or other providers to assist in your care. However, these providers may not participate in your plan's network. To avoid out-of-network costs and balance billing by non-participating providers, when you choose a hospital in your network, be sure to look for messages on the Find a Doctor Tool within the hospital's displayed information that identifies hospital-based providers not in your plan's network.

If your health plan has out-of-network benefits, Anthem may reimburse you up to the maximum allowed amount for covered services if you see a non-participating provider. The process and method used by Anthem to determine reimbursement for non-participating providers depends on your health plan. However, because Anthem does not have a contract with non-participating providers, they can balance bill you up to their full billed charges regardless of your insurance coverage.

Health benefit plans vary. We recommend that you consult your benefit plan document and/or contact the customer service number listed on the back of your ID card to confirm in advance that providers are in your plan's network and that the desired service is covered. Keep in mind that most HMO plans do not have out-of-network benefits and therefore may not reimburse for any out-of-network services except in limited circumstances. Anthem's provider directory is for general information purposes only and is not intended to be a substitute for medical advice or benefit plan documents.

Anthem utilizes EyeMed Vision Care, LLC for vision services pertaining to network management, claims processing and customer service.

To our knowledge, the provider information contained in this printed directory is accurate as of the date of printing but all information is subject to change and updates. There may be higher fees associated with visiting a doctor who is not in our network or for obtaining a service that is not covered by your plan. You may be responsible for those costs. To avoid higher fees we recommend that you confirm your doctor is in network and that the desired service is covered when scheduling your appointment.
